ENGINEERING DIVISION

EAST HARTFORD, CONNECTICUT- The Town of East Hartford has a proposed project for the pavement rehabilitation of portions of Main Street and School Street. The project is in preliminary design stage and has been recommended for construction under the American Recovery and Reinvestment Act (ARRA) administered by the Connecticut Department of Transportation. The Town of East Hartford is responsible for the design of this project.

It is the Town of East Hartford's and the State's policy to keep persons informed and involved when such projects are undertaken. It is important that the community share its concerns to assist in the project's development. The Town of East Hartford will conduct an informational meeting on Thursday, June 11, 2009 at 7:00 pm in the Town Hall Council Chambers located at 740 Main Street.

Project Description: The proposed project involves the milling and resurfacing of Main Street from Maple Street to Sutton Avenue and School Street from Burnside Avenue (Route #44) to Goodwin Street. The proposed project will involve the milling of and the overlay of the existing roadway surface with bituminous concrete. The total length of roadway to be resurfaced is approximately 6,000 linear feet. (Main Street = +/- 2,000 linear feet and School Street = +/- 4,000 linear feet of pavement resurfacing)

The Town of East Hartford does not expect right of way acquisitions and/or environmental permits to be part of this project. We also do not anticipate any utility conflicts as part of this project.

Based upon a preliminary assessment, the construction cost for the project will be approximately \$2,260,000. It is anticipated that the Federal Highway Administration will provide 100% of the construction cost with the Town providing the cost of the design efforts.

Anyone interested in obtaining further information or providing input may do so by contacting M. Denise Horan-Town Engineer-Town of East Hartford (860) 291-7384.
